Introduction

Axcis Technology Solution Provides – an innovative social enterprise aimed at equipping unemployed Indians with practical skills and experience to secure a job and a successful career in the IT industry.

Research shows that relevant learning means effective learning, and that alone should be enough to get us rethinking our lesson plans. The old drill-and-kill method is neurologically useless, as it turns out. Relevant, meaningful activities that both engage students with Real Time Technology and connect with what they already know are what help build Industries needs connections and cost effective quality.
